

Important Notice

This presentation contains statements that contain "forward looking statements" including, but without limitation, statements relating to the implementation of strategic initiatives, and other statements relating to Bodal Chemicals' future business developments and economic performance.

While these forward looking statements indicate our assessment and future expectations concerning the development of our business, a number of risks, uncertainties and other unknown factors could cause actual developments and results to differ materially from our expectations.

These factors include, but are not limited to, general market, macro-economic, governmental and regulatory trends, movements in currency exchange and interest rates, competitive pressures, technological developments, changes in the financial conditions of third parties dealing with us, legislative developments, and other key factors that could affect our business and financial performance.

Bodal Chemicals Limited undertakes no obligation to publicly revise any forward looking statements to reflect future / likely events or circumstances.

Investment Rationale

Most integrated Dyestuff (DS) player in India

Produces the largest variety of Dye Intermediates (DI) in India

Biggest manufacturer of DI in India

Strong global reach: exports to over 35 countries

Considerably protected from raw material price volatility: a majority of the Basic Chemicals (BC) and DI requirement sourced in-house

Strategically located with easy access to key raw materials

Captive power plant and steam generation reduces power cost

Increasing revenue share of high value add DS

A high level of integration at plants reduces logistic costs

High margin products such as Speciality Chemicals and Liquid Dyestaff expected to improve profitability

Conservative leverage profile: Total Debt to Equity of 0.6x & Net Debt/LTM EBITDA of 0.8x as of March 2016

Highlights from the Quarter

Q4 FY2016 vs. Q4 FY2015					
EBITDA	EBITDA Margins	Net Profit			
Rs. 443 million	21.6%	Rs. 226 million			
+48.2%	+882bps	+146.1%			

Commenting on the results, Mr. Bhavin S Patel, Executive Director of Bodal Chemicals said:

"We are pleased to report a good year with strong volume growth and improved profit margins. The company has witnessed better capacity utilization and overall volume growth of around 18% across all segments in FY2016. Excluding the effect of abnormality in the revenues in the first quarter of the FY2015, the company has reported better performance during the year. This is despite the effect on realizations from crude price driven lower raw material prices.

Looking ahead, increased finished goods prices and an increasingly diverse product portfolio are likely to yield benefits for Bodal Chemicals, especially in the second half of FY2017. We are looking forward to expanding production of our new unique products - liquid dyestuff, speciality chemical and LABSA, which will help us in improving our revenue and margin levels. Furthermore, progress at our Trion Chemicals plant is as per schedule; it is expected to be operational in the second half of FY2017."

Financial Performance

Key Financial Statistics

	Q4		у-о-у	Q3			Full Year Ended*	
(Rs. million)	FY2016	FY2015	Growth (%)	FY2016	Growth (%)	FY2016	FY2015	Growth (%)
Total Income	2,055.7	2,348.4	(12.5)%	2,038.7	0.8%	9,099.6	10,453.1	(12.9)%
EBITDA	443.1	299.1	48.2%	409.5	8.2%	1,685.2	1,887.5	(10.7)%
Margin (%)	21.6%	12.7%		20.1%		18.5%	18.1%	
Net Profit	225.9	91.8	146.1%	204.6	10.4%	859.9	917.8	(6.3)%
Margin (%)	11.0%	3.9%		10.0%		9.5%	8.8%	
Earnings Per Share (EPS)	2.07	0.84	146.4%	1.88	10.1%	7.88	8.41	(6.3)%

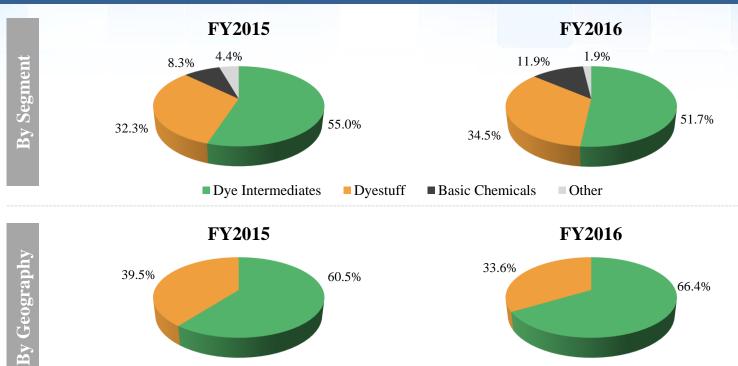

- For the full year, Total Income declined 12.9% y-o-y to Rs. 9,099.6 mn mainly due to effect of lower finished goods prices. Lower crude price for most of the year pushed raw material prices lower, thereby impacting realizations
- However, better realizations in Q4 FY2016 resulted in improvement in EBITDA margins to 21.6% from 12.7% in Q4 FY2015

Note: EBITDA including Other Income and Exceptional Items

Product Overview

Basic Chemicals & Dye Intermediaries

Basic Chemical - Highlights

- Centrally located manufacturing facilities
- 45% in house consumption
- Captive power plant & steam generation
- Latest upgraded production facilities

Product	Major Applications			
Sulphuric Acid				
Oleum 23% & 65%				
Sulphur Trioxide				
Chlorosulphonic Acid	H ₂ SO ₄			

Dye Intermediaries - Highlights

- Largest manufacturer in India with 25 years of experience
- Consumes 40% of dye intermediates in-house
- High entry barriers
- Competitive to Chinese suppliers in terms of pricing
- Easy raw material availability in Gujarat
- Only player with effluent disposal permission of 10 lac litres per day
- After implementation of a new policy to deal with environmental issues in China, setting up a new facility in the country has become tougher
- In a position to sell outside or consume in house depending upon market dynamics

Product Overview

Dyestuff

Highlights

- Large capacity for standardizing, storage and packaging & distribution
- In house ice plant with 300 MT/day capacity
- In house ETP plant with 1 million liters / day
- Sales across more than 35 countries
- Contract manufacturing for leading MNCs
- Scope for increasing production with existing infrastructure

Product	Major Applications
Reactive Dyes	
Acid Dyes	
Direct Dyes	

Key Milestones

2016 • Amalgamation of Bodal Agrotech with Bodal Chemicals

2014 / 2015 • Carried out one of the earliest debt repayments and exit from CDR

2012 • CDR approved

2010 • Carried out backward integration to start producing basic chemicals

2008 • Acquired Milestone Organics Limited (Plant VIII)

2007 • Initiated a mega expansion at Plant VII

2006 • Reverse merger with Dintex Dye Chem and got listed on the BSE exchange; Bought Unit IV

2004 • Carried out forward integration to start producing Dyestuff

1994 • Changed name to Bodal Chemicals

Strategic Direction

	Trion Chemicals	LABSA Production	Liquid Dyestuff Production
Details	 42% owned associate company To produce a compound which is a disinfectant, algicide and bactericide mainly for swimming pools. It is also used as a bleaching agent in the textile industry Production expected to start in H2 FY2017 	 Started new plant near Plant VII for production of Linear Alkyl Benzene Sulphonic Acid (LABSA) It is an anionic surfactant widely used in formulation of all ranges of Domestic Detergents Powder, Cake & Dish wash cleaners Looking forward to increasing production in the near term 	 Used in paper industry for coloring paper Looking forward to increasing production in the near term
Capacity (Per Annum)	• 12,000 MT	• 18,000 MT	• 10,800 MT
End Market	⊕ Ω∩=	\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\	

Roadmap

Increasing capacity utilization and adding new products to the diversify into more value added product lines

2x Revenue growth over next 3-4 years

• Introduction of new products

Capacity expansion

Capacity expansion in Dyestuff

Trion Chemicals

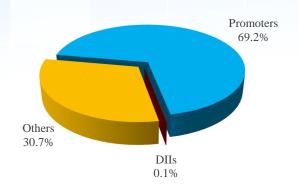

Liquid Dyestuff

LABSA
